Advances in Drug Delivery and Biomaterials: facts and vision

Aim of the Workshop

Drug delivery and Biomaterials are different area of science but, at the same time, are tightly related and intertwined.

The 2018 CRS Italy Chapter Annual Workshop aims to explore the more recent advances in the design and development in these areas.

Many colleagues coming from Europe will participate to the Workshop, to stimulate the discussion, to explore new frontiers and to tackle new horizons.

To foster the discussion on recent researches and networking opportunities among attendees, all poster presenting authors are asked to provide a short talk.

10 minutes presentation followed by 5 minutes discussion will be scheduled in the dedicated poster area. Only a limited number of posters (about 40) will be selected.
